
A
+2 information-matched
+2 depletion (WNT k_W=0.02, RA-free)
+2 depletion (β-cat double KO, RA-free)
mechanistic control (geo. mean)
CRLB of basal rate, design / base design
deletes W / removes the net with the anchor
fractional WNT knockdown pins W
RA→HOXA5 (a_5)
RA→CYP26 (a_C)
β-cat→MYC (a_M)
β-cat→CYP26 (a_C)
β-cat→HOXA13 (a_{13})
MYC→HOXA13 (a_{13})
HOXA13→β-cat (W)
B
RA restriction (a_5)
WNT KD (a_M)
β-cat double KD (a_M)
Normal
Severe
information lost to the net, $\Gamma_{net}/\Gamma_{mech}$
achieved anchor ratio ρ (0 drawn at 2×10^{-5})
C
Spearman +0.79 (n = 116)
anchor ratio alone +0.55
edge atlas (base design)
depletion A/B
information-matched
dose-response
prospective test
measured hybrid basal error (%)
CRLB of basal rate, Γ_{net} (per unit residual noise)
